SUMMER TRANSPORTATION INSTITUTE – 2010

Program Description: In an effort to address the need for a diverse workforce in the 21st Century and to create an awareness of the career choices and opportunities that exist in the transportation industry, the United States Department of Transportation (USDOT) and the Federal Highway Administration (FHWA) established the National Summer Transportation Institute Program. In this program, middle and high school students participate in a series of academic and practical experiences designed to motivate them toward professions in the transportation industry. The program shows the students what the transportation Industry employs: administrators, political scientists, social scientists, computer scientists, as well as engineers (mechanical, electrical, civil, etc.). There is no fee to attend and the lunch meal will be provided free-of-charge.

Clark Atlanta University is one of over 40 universities around the country that offer a Summer Transportation Institute (STI). Participants at CAU will also be provided with mathematics, science, and technological enrichment to enable them to pursue a career in transportation. At CAU, the program is designed for upcoming 9th **through** 12th grade students with a minimum grade point average of 3.00. Students must express a sincere interest in science, engineering, or mathematics, or any related field pertinent to transportation in their application.
