

ASSIGNMENT #14

SEE WHAT I'M SAYING

PROJECT

First, choose an object to recreate. Find or take a digital photo of your object and place it into Adobe Illustrator on layer 1.

Second, render your object solely with type (on other layers). Use the letters on the object or words for each part of the object as the mass of the composition. (eg. render the handle of the object through the word "handle"). You are restricted to using **one typeface**. Use different sizes and weights of type to create variation and interest. Use **only black** for this composition, do not add any color.

Fit your composition to an 8 1/2" x 11" document.

Save this artwork as "lastname_objectname.ai" Save your file onto your USB. Save a copy of it into the Drop Box.

WHAT TO TURN IN
